

## PRE-PROFESSIONAL STUDIES AT CMU

### Preparing for a Career in HEALTH STUDIES

A year of study at Canadian Mennonite University (CMU) could prepare you to meet the entrance requirements for a baccalaureate program in Health Studies. **This page explains what you must complete if you wish to continue studies at the University of Manitoba to earn a Bachelor of Health Studies.** If you intend to pursue studies at some other university, similar possibilities exist. It is important, however, that you inquire about admission and program requirements at the university you are considering and that you work with the Coordinator of Student Advising at CMU to construct a program of studies at CMU that will achieve your objectives.

If you intend to earn a baccalaureate degree in Health Studies at the University of Manitoba, you can begin with one year of studies at CMU and complete the degree program at the University of Manitoba *without adding to the time it would take if you were to go directly into the University of Manitoba.*

Students must achieve a minimum grade point average of 2.00 in at least 24 credit hours of courses to become eligible for admission to the Bachelor of Health Sciences at the University of Manitoba. However, admission may be competitive, so you may need higher grades.

The following chart provides a sample registration for a qualifying year. There are other possible ways of registering. CMU's Coordinator of Student Advising will be available to advise you when you register.
